

Maths Pack - SPECIAL DEAL

2simple

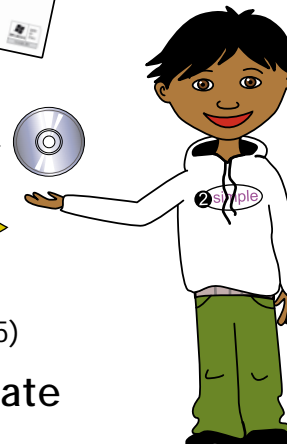

Counting and understanding number

Calculating

Using and applying mathematics

Limited Offer
Valid until
December 31st 2009

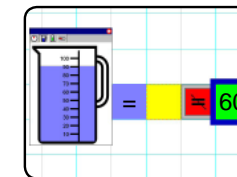

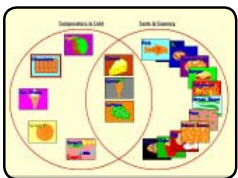

5 programs for just £555

(All on site licences - normal cost would be £1,495)

Maths Games • 2Calculate • 2Investigate
Maths City 1 • Maths City 2

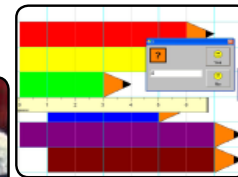

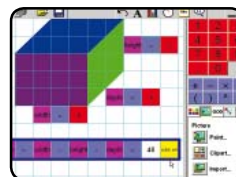

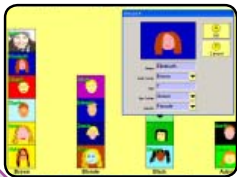

Please see the reverse of this flier for more info and ordering details.

Handling data

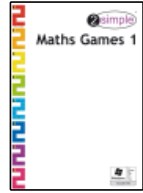

Understanding shape

Measuring

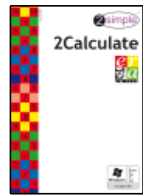

The 2Simple Maths Pack contains these programs:

2simple

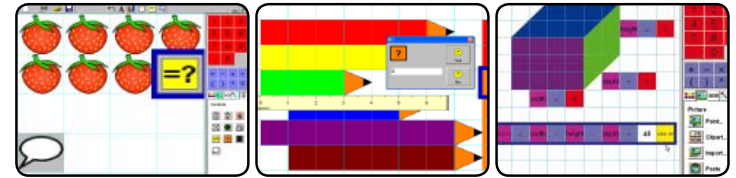

Maths Games

A suite of six fast-paced games designed to make mathematics for children aged 6-11 fun, effective and meaningful. In traditional arcade style, these games are set to engage children from their first click whilst the high pace of learning will keep them striving to improve.

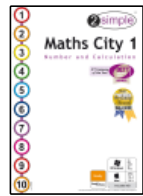

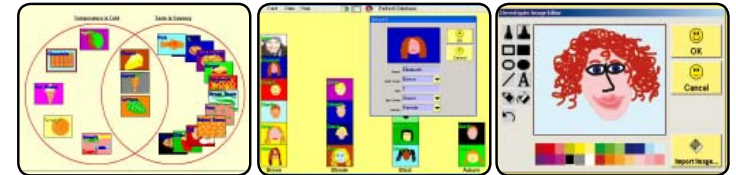

2Calculate AWARD WINNER

A great way to improve mathematics learning for children aged 4-12. 2Calculate offers the same powers as a basic spreadsheet but it uses language and mathematical symbols that we can all relate to. The wide range of pre-set activities and videos will challenge and stimulate the minds of the children in all areas of mathematics.

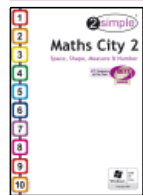

2Investigate

2Investigate is a database package that shows visually what happens when a database sorts data, enabling children aged 6-9 to understand the sorting process. The children use the computer to move the data cards around the screen to perform meaningful sorts and searches, displaying them as Venn Diagrams and graphs.

Maths City 1 AWARD WINNER

Maths City 1 allows children aged 4 and 5 to explore practical everyday maths in five Foundation Stage topics: Transport, Space, The Farm, Shops and Outdoor Play. Instructions are spoken or sung through catchy tunes and the differentiated levels ensure that all children engage fully with this unique program.

Maths City 2

With Maths City 2, children aged 4 and 5 can explore the concepts of space, shape, measure and number in five Foundation Stage topics: The Birthday Party, The Building Site, The Fruit Shop, The Shoe Shop and Underwater World. Plans and ideas for off-screen activities are also included.
